### UV-12-KIT

#### Item Number 9884406

Safe leak detection with the compact and powerful UV-12 ultraviolet leak detection lamp. The UV-12 can either be connected directly to a vehicle battery or operated with the practical battery pack. It is suitable for the automotive sector as well as for industrial air conditioning and refrigeration applications. One shot with the practical filling pistol is sufficient for a system with 1.5 kg refrigerant and up to 300 grams of compressor oil.

Includes:

- UV leak detection lamp 12 Volt/100 W
- Vehicle battery terminals
- Injection gun for Glo-Leak
- Glo-Leak replacement cartridge

- Safety goggles
- Connecting hose with quick coupler (Auto)
- Connecting hose ¼" SAE

- Leak detection in rooms difficult to access
- Long-lasting UV effect, even with unpressurised systems
- In a sturdy plastic case
